

Roller Wrapping Tape RWT2000

Shorter and frequent runs as well as a higher quality demand are the minimal requisites of the printing and coating industries. Our WRT2000 allows to the professionals to be updated with these changes. Its special embossed surface avoids the deposit build-up and makes it the ideal solution for every kind of coating or printing.

Purposely developed to offer a solution to the different processes of production and printing which use rollers systems and convert materials such as films, textiles, paper, etc.

WRT2000 grants:

- constant quality of the final result, thanks to its outstanding anti-slip property which ensures stability to materials during their manufacturing;
- cost cuts of downtime for cleaning, since the product prevents the build-up of adhesive and ink accumulations, etc;
- easy removal from cylinders even after a long period of usage.
